Canada's Child Health Declaration

While Canada offers outstanding opportunities for growth and development, children in Canada face many health challenges that threaten their ability to reach their full potential. Addressing those challenges and ensuring that the children of Canada have the best possible health must be a national priority.

As Child Health Champions, we share a vision that all children in Canada have access to a safe and secure environment; opportunity for optimal health and development; and access to a full range of health services and resources.

We, the undersigned, are committed to working together to realize this vision, so that the children of Canada will be among the healthiest children in the world.
